ABOUT ME

I am a cheerful, industrious, and altruistic individual who thrives in collaborative environments. With a positive attitude and strong work ethic, I consistently meet deadlines with high-quality results. Embracing challenges as opportunities to grow, I'm driven to learn and contribute to the success of the organization, while supporting team members in achieving collective goals.

EDUCATION

H/Walasmulla National School | 2014-2022

G.C.E. A/L - 2022(23), G.C.E. O/L - 2019

PHYSICAL SCIENCE STREAM (Combined Maths- C , Chemistry- C , Physics- S)

SLIIT | 2023

BSC(HONS) IT SPECIALIZING IN SOFTWARE ENGINEERING |2023-2027

WORK EXPERIENCE

Hastiyait (PVT) Ltd - Software Engineering(intern)-(August 2025 - May 2026)

- Developed cross-platform mobile applications using React Native, Flutter, Kotlin, and Java.
- Implemented authentication, cloud databases, and real-time features using Firebase and Supabase.
- Integrated RESTful APIs and WebSocket for real-time communication and data synchronization.
- Built and maintained WatchOS applications synchronized with companion mobile apps.
- Used Git for version control, managing branches, code reviews, and collaborative development while optimizing app performance and UI/UX.

PROJECT EXPERIENCE

PRIMEHIVE - IOT Smart Home Security Management System(2026) FEBRUARY

- Built an IoT Smart Home Management System that enables real-time monitoring and remote control of connected devices through a scalable and responsive platform. Implemented Remote Procedure Call (RPC) for device control and developed a state management system for secure device operation, while integrating telemetry for real-time state synchronization. The system supports zone-based device grouping, automation with triggers and scheduling, real-time alerts, and auto-calling for critical events. Leveraged ThingsBoard for device management and remote monitoring, ensuring reliable command execution and accurate device response handling.

Tech Stack: Flutter,Nest.js,MongoDB , ThingsBoard,RPC,Web Sockets,JWT

● CEY COIR-Enterprise Management System(2025 June)

- Worked on the finance management module of the system, focusing on income and expense handling using state management. Implemented salary management features and enabled payment slip generation with QR codes and PDF export. Also contributed to improving user experience with charts for better financial visualization.

Tech Stack: React.js, Tailwind CSS, Node.js, Express.js, MongoDB

● Online Movie and TV Series Browsing System(2024 November)

- Designed and developed a modular web system using Java and MVC architecture. Implemented CRUD functionalities with backend logic in Servlets and JDBC, and managed the database through phpMyAdmin during early stages, later migrating to MySQL. Applied OOP principles to structure the application for maintainability and scalability.

Tech Stack:Java, MySQL, HTML, CSS, JavaScript

SKILLS

Front-End Developing

- Flutter
- React Native
- JavaScript
- React JS
- Tailwind CSS
- Flutter
- Kotlin

Back-End Developing

- Nest.js
- Node JS
- Java
- Express JS

Database

- MongoDB
- MySQL

Others

- Python
- C
- C++
- Figma
- Github

CERTIFICATIONS

- Web Design for Beginners(2023 University Of Moratuwa)
- Python for Beginners(2023 University Of Moratuwa)

SOFT SKILLS

- Computer proficiency
- Problem-solving abilities
- Communication skills
- Teamwork and collaboration
- Leadership Experience
